PANEL
GLIDES

The Fashionline Panel Glide system is a contemporary method of providing privacy and Sun protection, a versatile blind product designed to easily control light and glare in your home or office. Panel Glides are a modern, innovative option for large windows, sliding doors and bi-fold doors, using wide fabric panels to suit a minimalist decorating style. They combine well with Roman Blinds and can be easily operated and moved out of the way for access areas."

Panel Glide fabric panels can be easily and quickly updated whenever fashions or individual tastes change, or if damage occurs. This also allows for panel colours to be updated whenever fashions or individual tastes change. These easy to use systems are created from flat fabric panels attached to a trouble-free head rail system using roller-mounted carriers that result in a light weight and easy operation. The fabric panels can then be drawn sideways, to either side, or to a centre stack, using either a cord or wand operating system.

UNIQUE DESIGN

INNOVATIVE

MODERN

Call your Fashionline consultant today to discuss the complete range of options available with this sophisticated looking blind including the extensive selection of fabrics, available in Plain, Roman and Jamaican panelled styles. The Jamaican look features streamlined wooden battens on the front and rear of the fabric offering a very unique design look for today's living. You'll be surprised at the range of colours, pattern prints and textures along with the choice of block-out, translucent and sunscreen fabrics.
