

Enclose your outdoor spaces; maintain your views.

Straight Drop Patio Blinds

Transform your outdoor living space in an outdoor room with these beautiful blinds. Designed to add protection and privacy, they keep summer sun and winter winds out, leaving you free to relax and entertain in comfort.

Ideal for enclosing patios, pergolas and verandahs, they are available in a range of durable fabrics engineered for harsh outdoor conditions. From partial to total blackout, you can choose the level of filtering required. If sunlight is not an issue and your concern is more for wind protection, you can choose a PVC finish that acts like a window so you can still enjoy the view. Straight drop patio blinds are also an ideal solution for keeping in winter warmth, allowing you to use your outdoor room well into the cooler months.

You'll be amazed at the aesthetic difference they'll make to your home. The range of contemporary colours and textures allows you to coordinate blinds to suit the architecture of your home, enhancing its presentation and adding value to your property. Choose from a variety of operating systems including spring operated, rope and pulley or gearbox driven, or for the ultimate in ease and luxury, have the control motorised so you can raise or lower your blinds simultaneously at the push of a button.

INCREASE YOUR ENERGY EFFICIENCY.

Strategically placed exterior blinds allow you to reflect heat away before it enters your home. This helps your home stay cooler and reduces your reliance on air conditioning to bring room temperatures down. In winter months, simply roll blinds up so sunlight can stream into your home, warming the atmosphere naturally. It all helps to lower your energy costs.
